|                                 |                     |                       |
|---------------------------------|---------------------|-----------------------|
| Anesthesia                      | Gynecology          | Primary health care   |
| Cardiology                      | Hematology          | Psychiatry            |
| Cardiovascular surgery          | Infectious diseases | Rheumatology          |
| Dermatology                     | Nephrology          | Thoracic surgery      |
| Emergencies                     | Neurology           | Traumatology          |
| Endocrine surgery Endocrinology | Neurosurgery        | Urology               |
| ENT                             | Oncology            | RESEARCH LABORATORIES |
| Gastroenterology                | Ophthalmology       | Immunology            |
| General surgery                 | Pediatrics          | Biochemistry          |
| Geriatrics                      | Plastic surgery     | Pathology             |
| Maxillofacial surgery           | Pneumology          | Microbiology          |
| Medicine                        |                     | Pharmacology          |

Most of the rotations (though not all of them) are offered in all three affiliated hospitals and, thus, three slots per rotation are available. PLEASE NOTE THAT WE WILL MAKE EVERY EFFORT TO MEET YOUR REQUEST, BUT THE FINAL ALLOCATION WILL DEPEND ON HOSPITAL/ELECTIVE AVAILABILITY.

**Description of the clinical rotation experience - what does a typical day consist of?**

- Morning rounds, 8:30-14:30, Mon-Fri
  - Possibility of being on call
  - Morning basic/clinical sessions, research meetings, and teaching seminars
  - English speaking tutors for students who are not fluent in Spanish; medical students may assist in translating patient interactions
  - Short term stays in translational research laboratories, if available (Pharmacology, Immunology, Biochemistry, Microbiology), may be feasible.
